# SOFIA FINTECH MAPPING 2020

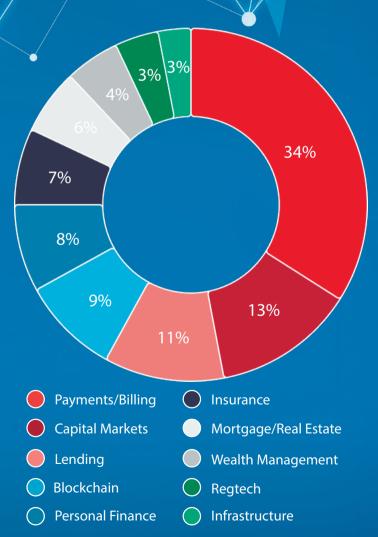

# FINTECH SOFIA - 2020

Fintech, short for financial technology, represents the effect of new technologies on the financial sector. The term Fintech stands for new business approaches, products, and services that remodel the common understanding of financial and banking services. Fintech could be any company, whose core business is related to the creation or use of technologies, enabling innovations, facilitating the offering, access, and/or usage of financial services, etc.

Historically, the application of innovation and technology in finance in Bulgaria dates back to the late 1960s when the first computers were installed in the Bulgarian banks. Ever since then, despite any economic and political obstacles, Bulgaria has always managed to keep up with financial technology.

### SOFIA FINTECH LANDSCAPE 2020

## Bulgarian Fintech Ecosystem In 2020

Although in 2020 the world is going through an unprecedented crisis devastating for many companies, Fintech has proven comparatively resilient during the COVID-19 pandemic.

In 2020, the Bulgarian Fintech ecosystem consists of:

- about 100 Fintech companies
- operating in 9 different Fintech segments
- covering the whole range of products and services
- an ever-growing number of startups, VC funds, and angel investors
- over 90 IT companies, providing software products and services for Fintechs

Figure 1 shows the healthy diversification of the Bulgarian Fintech industry:

- the payments/billing segment is the largest contributor to Fintech in the country, followed by lending and capital markets
- other booming segments are *blockchain/crypto, insurance,* and *personal finance* business, which accumulate about ¼ of all Fintechs in Bulgaria

## Sofia - The SEE Fintech Hub

Sofia, the capital of Bulgaria, is the most preferred location with 83 of the Fintech companies being headquartered there. According to the 2020 Global Fintech Index (GFI), three countries in the region are among the 60 best Fintech ecosystems in the world: Slovenia, Bulgaria, and Romania. At a city level, Sofia is the leading Fintech location in SEE, according to GFI, followed by Ljubljana, Bucharest, and Cluj-Napoca, all of them in the Top 50 in Europe.

With innovation and digitalization at its core, Fintech companies significantly contribute to boosting any country's potential for innovation and new technologies. For developing countries such as Bulgaria, the Fintech industry is one of a few opportunities for catching up and developing a highly efficient economy. In this sense, although Bulgaria's Fintech industry is a comparatively small contributor to the GDP, it is very important for the overall efficiency and modernization of the economy. Ultimately, creating and developing more Fintech business models in Bulgaria puts the country on the map of Future Finance.
